AVG. CloudCare™

AVG Email Security Services

Introducing a new suite of email security services designed to keep your business communications more efficient, secure, and spam-free. Now your Managed Service Provider can deploy, monitor, and update all anti-spam, archive, and encryption services from any web browser via the AVG CloudCare portal, with no need for investing in any additional hardware or third-party software. Email security is handled without tying up your time or resources.

AVG AntiSpam
Nothing is more frustrating than in-boxes full of scams and spam, but now there's a simple and effective fix. AVG AntiSpam is a cloud-based email security service that delivers comprehensive protection against spam, viruses, phishing attacks, and other email-borne threats. Always automatically up-to-date, it tackles dangers in the cloud before they ever have a chance to impact your network.

AVG Email Archive
You want an email system that is accessible 24/7, guarantees email continuity and that can be easily searched by individual employees no matter what happens at your local network level. AVG Archive is a simple, secure, cloud-based solution that integrates seamlessly with your existing email infrastructure. It automatically routes all incoming, outgoing and internal email through the AVG Archive Cloud Gateway, so every message can be safely stored, searched for and recovered to individual desktops 24-7.

AVG Email Archive Lite
If you are looking for short-term/lower cost solution, you may want to consider our simpler version of archiving—AVG Email Archive Lite. This service offers secure archive storage of all emails on a rolling 60-day basis so your employee can search, access and recover emails without the need to contact your IT specialist or IT provider. After 60 days, the emails and information are automatically deleted.

AVG Encrypted Email
Helps prevent identity theft and security breaches at your company by providing complete and efficient email protection. It eliminates the need for sender/recipient authentication by automatically encrypting all inbox-to-inbox communication through a hosted, secure network to more easily comply with industry regulations and safeguard your company's sensitive information.

Ask your Managed Service Provider if AVG Email Security Services are right for your business.

When communication can be this efficient and secure… Why complicate?
