

When eliminating IT headaches is this easy...

Why complicate?

Boost your company's productivity and reduce stress by simplifying and streamlining your IT management with services designed specifically for you!

Peace of mind

Whether you're working in the office or on-the-go, know that your protection is always the very latest and best. Now you can spend your time growing your business— not worrying about IT issues.

Spam free

We all know that spam can be a pain, and sorting through endless emails is a waste of time. Why not let **Domain Networks** implement an Anti-Spam solution with options like archiving and encryption services?

Improve productivity

Use content filtering to manage personal use of the Internet and keep your employees focused on the things that move your business forward.

Remotely resolve issues

Issues may occur in your network, but don't worry, Domain Networks can resolve these issues instantly and remotely take control of your system if needed.

Simple, fast, flexible and affordable... It's the answer to more productivity, more protection and more control.

Instant notifications	When issues arise on your network, rest assured that Domain Networks will be notified immediately to take action and rectify those issues while your employees work.
AVG® AntiVirus	Keeps your network and employees safe against online threats with the latest award-winning protection.
AVG® Content Filtering	Reduces your exposure to web-distributed malware and can improve productivity by limiting personal use of the Internet.
Restriction level	Have the option to 'Allow', 'Warn' or 'Block' users attempting to access blacklisted/whitelisted sites. Domain Networks can also set schedules to 'deny' websites during working hours.
Real-time updates	The most current protection will be applied the moment your employees go online.
Private Cloud	Company information is protected, encrypted and securely stored. Customer data is always held securely in a known location on known AVG servers with no outside or third-party provider access allowed. Your data is only accessible to Domain Networks .
One-click service activation	Domain Networks can activate or deactivate services with a click of a button.
Simple pricing	No minimum contract fees or requirements.
No set-up costs	No hardware or software requirements equals no additional investment.
